To:
Who it May Concern,

June 02, 2026

Dear Sir/Madam

LLM related Positions

My name is Ramazan. I am currently pursuing my PhD, which was funded by the DAAD and the University of Central Asia through 2026. I am preparing for my defense in the upcoming months and am currently looking for a career opportunity. In the followings lines, my qualifications are shortly explained:

I bring over 4 years of professional software engineering experience, including the successful delivery of two projects using the Design Thinking Process (DTP) ¹. During my doctoral research in Germany, I focused extensively on the theoretical foundations of Artificial Intelligence and am now eager to transition back into industry.

In addition to my 5 years of software development experience, my PhD work provided me with deep theoretical and practical expertise in Large Language Models (LLMs) and general AI systems. I possess a strong command of Transformer architectures and Small Language Models (SLMs), alongside extensive experience leveraging LLM APIs across multiple providers. As an example of my research output, my published paper evaluates the logical reasoning capabilities of various models:

https://bahramiramazan.github.io/assets/pdf/Final_INLG_GM.pdf

More recently, as a personal project, I built a fully functional AI Agent designed for brainstorming and ideation. The system utilizes LangChain alongside a vector database (I would be glad to share further details in person). On the practical industry side, I contributed to the Yar platform, an AI-powered educational web application for students in Afghanistan. Serving as the Lead AI Developer, I implemented the automated learning assistant features. Additional project details can be found on my website:

<https://bahramiramazan.github.io/projects/>

I would welcome the opportunity to learn more about your organization and contribute to your team's ongoing initiatives.

Sincerely,

Ramazan Bahrami

Year of birth: 1990

Work Experience

10/2022 – Present **Research Assistant, University of Göttingen, Göttingen**

- Conducted research in Natural Language Processing (NLP).
- Evaluated and optimized language models for specialized tasks.
- Authored and published research papers at international conferences.

Tech Stack: Python PyTorch Slurm Git NumPy Pandas Matplotlib Containers

06/2017 – 08/2021 **Software Developer & Lecturer, Kabul University, Kabul, Afghanistan**

- Developed code while establishing development standards and comprehensive documentation.
- Independently managed Agile methodologies and UML modeling for requirement analysis.
- Designed a Big Data curriculum focusing on graph data processing using Neo4j.

Tech Stack: Python UML Django JavaScript Vue.js HTML Neo4j

09/2019 – 06/2020 **Lecturer, AUAF, Kabul, Afghanistan**

- Taught undergraduate courses including Human-Computer Interaction (HCI) and programming.

09/2013 – 06/2015 **Web Application Developer, ADRAS, Kabul, Afghanistan**

- Developed web applications using CodeIgniter and performed functional system testing.

Education

2017 **Master of Science in Computer Science, South Asian University (SAU), New Delhi, India**

2012 **Bachelor of Science (Physics, Mathematics, Computer Science), University of Mysore, Mysore, India**

Projects

2025 **Sentential Relation Extraction**

<https://github.com/bahramiramazan/re-representation>

Capsule Network-based architecture outperforming baseline SOTA models in sentential relation extraction.

Tech Stack: Transformers Capsule Networks Python PyTorch

2026 **GraphMapping**

<https://github.com/bahramiramazan/graphmapping>

A novel evaluation framework designed to assess reasoning capabilities across different LLMs.

Tech Stack: LangChain DeepAgent Agentic Reasoning

- 2017 **Processing of SPARQL Queries on GraphFrames**
Leveraged GraphFrames for efficient execution of graph queries on large-scale datasets.

Tech Stack: Java Scala SQL SPARQL

Languages

Persian	Native
English	Full Professional Proficiency
German	Fluent (Targeting C1 Certification in October 2026)
French	Basic (B1 Level)

Community & Social Activities

- ACM/ICPC Organized the inaugural ACM/ICPC programming competition in Kabul, Afghanistan.
- AUAF Organized a workshop series (2019–2021) promoting research and STEM education for university faculty; served as an active organizing committee member.
- ICTP PWF Participated as an instructor in the *Physics Without Frontiers* online Machine Learning workshop in Afghanistan, teaching Python, ML, and High-Energy Physics fundamentals.

Interests & Hobbies

- Football Medal winner in university tournaments during undergraduate and master's studies. Awards: Best Player (2011, Mysore) and Best Referee (2016, SAU).
- Volleyball Enthusiastic player, specifically beach volleyball.
- Chess Passionate chess player.
- Leisure Outdoor hiking, reading novels, and watching TV series.

Publications

- 2025 **Bahrami, R.** and Yahyapour, R.: "Re-Representation in Sentential Relation Extraction with Sequence Routing Algorithm". In: *Proceedings of the 8th International Conference on Natural Language and Speech Processing (ICNLSP-2025)*, Association for Computational Linguistics, pp. 315–327.
- 2024 **Bahrami, R. A.** and Yahyapour, R.: "Multihop Question Answering, A Topological Approach for Graph Generation". In: *2024 6th International Conference on Natural Language Processing (ICNLP)*, pp. 770–774.
